

Teacher Subject Specialism Training: Secondary Maths

Do you have non-specialists teaching maths?

Nationally there is a significant shortfall in qualified maths teachers. It is proving to be increasingly challenging staffing departments in this subject. The TSST provides an opportunity to upskill existing teachers for this area. This is targeted at non-specialist teachers who could potentially teach maths in addition to their main subject or teachers who want to retrain as maths teachers.

| Question | Answer |
|--------------------------------------|--|
| How much does it cost? | It is free . |
| What is the content? | The maths strand will train participants on the subject and pedagogical knowledge associated with this subject for teachers to deliver up to GCSE. |
| Who can apply? | Anyone who currently teaches maths or teachers who want to retrain as maths teachers. |
| What is the time commitment? | The maths strand will involve 5 face to face training days throughout the academic year 20/21. Private study between contact days will be provided. |
| Where will the face to face days be? | All of the days will be located at Cheadle Hulme High School, Stockport. |
| What is the qualification? | The maths strand will be certified by the Altius Alliance and the NCETM. This pathway has the option of gaining masters accreditation for an additional fee. |
| How to I sign up? | For further information, please contact Dr David Woolley: David.Woolley@didsburyhighschool.org.uk For dates and to secure a place, please email Karen Warhurst: karen.warhurst@chhs.org.uk |
